

Company Doctor Services

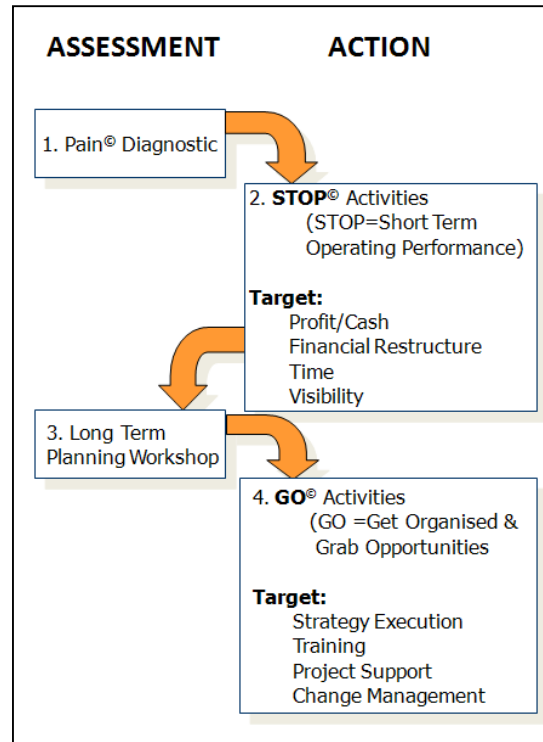

From Short Term Remedy to Long-Term Health Plan

In tough times, your company bleeds cash:

- stocks rise as sales fall;
- you keep supplying goods and services, but customers delay payment;
- support from banks is hard to come by;
- bad debts push you closer to the edge.

Untreated, the leakage reaches a point where self-treatment is ineffective. You need a doctor to help you:

- diagnose the pain points - identify what needs to be done and do it today!
- STOP© the symptoms - manage critical cash issues, restructure finances and maximise short-term profits;
- plan a healthier future for the business;
- GO© for growth - get organised and grab the opportunities as the future brightens.

Specialists with the right prescription

Parrallel's senior consultants specialise in changing business performance: working to boost sustainable cash and profit generation, restructuring the finance and business models and increasing the long-term value of the business.

With global experience gained at director level in over 60 countries in small, medium and large companies, Parrallel have achieved success in sectors as diverse as Engineering, Manufacturing, Medical Equipment, Rail, Software Development, PR & Communications, Utilities, Household products, Toys, and Business to Business Services.
